

"I'm an agent of change for the current, next, and future generations of persons affected by mental health, substance use, and suicidal conditions. In this movement, I enthusiastically equip others on advocacy, education on resources and supports, and bring public awareness as it relates to the areas mentioned. My vision involves impacting a culture on learning how to respond rather than react against the stigma of mental health and other symptoms that impair a person's ability to function. I want to enhance their ability to improve their own life and the lives community."
